

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A docking station assembly for receiving a digital camera ~~transmitting digital files~~, the docking station assembly comprising:

a) a housing for forming ~~an enclosure~~ a base portion for the docking station assembly and said housing includes an insert-receiving portion for receiving any of a plurality of removable and replaceable inserts; and

b) a removable and replaceable insert having a docking mating portion on first side which mates with the insert-receiving portion, and having a camera mating portion on a second side having a shape substantially of a portion of the digital camera and which camera mating portion can receive the digital camera ~~a particular electronic device~~.

2. (Original) The docking station assembly as in claim 1 further comprising a plurality of removable and replaceable inserts.

3. (Original) The docking station assembly as in claim 1, wherein the insert-receiving portion is a notched-out portion.

4. (Currently Amended) The docking station assembly as in claim 1, ~~wherein the electronic device is a digital camera~~ further comprising a light indicator for indication charging of the digital camera.

5. (Currently Amended) The docking station assembly as in claim 1, wherein the ~~electronic device~~ digital camera is a wireless device.

6. (Currently Amended) The docking station assembly as in claim 1 further comprising an electrical connection disposed on the housing for connection to the ~~electronic device~~ digital camera.

7. (Original) The docking station assembly as in claim 6 further comprising a floor of the insert having a notched-out portion through which the electrical connection passes.

8. (Currently Amended) The docking station assembly as in claim 7 further comprising one or more stabilizing elements for providing stable support for connection of the ~~electronic device~~ digital camera to the insert.

9. (Currently Amended) The docking station assembly as in ~~claim 2~~ claim 1 further comprising an electrical cable attached to said housing for transmitting digital signals.

10. (Currently Amended) The docking station assembly as in claim 9 further comprising a power cable attached to said housing for transmitting electrical power to the ~~docking station assembly~~ housing.

11. (Currently Amended) A docking station assembly for receiving a digital camera ~~transmitting digital files~~, the docking station assembly comprising:

a) a base portion ~~housing for forming an enclosure~~ for the docking station assembly and said ~~housing~~ base portion includes a notched-out portion for receiving any of a plurality of removable and replaceable inserts that mates both with the housing base portion on a first side and the digital camera on a second side ~~a particular electronic device~~.

12. (Currently Amended) The docking station assembly as in claim 11 further comprising a removable and replaceable insert having a docking mating portion which mates with the notched-out portion on the first side, and having a camera mating portion on the second side having a shape substantially of a portion of ~~a particular electronic device~~ the digital camera.

13. (New) The docking station as in claim 1 wherein the first side and the second sides are on substantially opposite sides to each other.

14. (New) The docking station as in claim 11 wherein the first side and the second sides are on substantially opposite sides to each other.

15. (New) The docking station assembly as in claim 11 further comprising a light indicator for indicating charging of the digital camera.

16. (New) The docking station assembly as in claim 11, wherein the digital camera is a wireless device.

17. (New) The docking station assembly as in claim 11 further comprising an electrical connection disposed on the base portion for connection to the digital camera.

18. (New) The docking station assembly as in claim 17 further comprising a floor of the insert having a notched-out portion through which the electrical connection passes.

19. (New) The docking station assembly as in claim 18 further comprising one or more stabilizing elements for providing stable support for connection of the electronic device to the insert.

20. (New) The docking station assembly as in claim 11 further comprising an electrical cable attached to said base portion for transmitting digital signals.

21. (New) The docking station assembly as in claim 20 further comprising a power cable attached to said base assembly for transmitting electrical power to the base portion.

22. (New) A digital imaging assembly comprising:

a) a base portion having an insert-receiving portion for receiving any of a plurality of removable and replaceable inserts; and

b) a first removable and replaceable insert having a docking mating portion on first side mated with the insert-receiving portion, and having a camera

mating portion on a second side having a shape substantially of a portion of a first digital camera;

wherein the first digital camera is mated to the camera mating portion.

23. (New) The digital imaging assembly as in claim 22 further comprising a second removable and replaceable insert substituted for the first insert, and the second insert includes a docking mating portion on a first side mated with the insert-receiving portion, and having a camera mating portion on a second side having a shape substantially of a portion of a second digital camera;

wherein the second digital camera is mated to the camera mating portion.

24. (New) The digital imaging assembly as in claim 22, wherein the insert-receiving portion is a notched-out portion.

25. (New) The digital imaging assembly as in claim 22 further comprising a light indicator for indicating charging of the first digital camera.

26. (New) The digital imaging assembly as in claim 22, wherein the first digital camera is a wireless.

27. (New) The digital imaging assembly as in claim 22 further comprising an electrical connection disposed on the base portion for connection to the first digital camera.

28. (New) The digital imaging assembly as in claim 27 further comprising a floor of the insert having a notched-out portion through which the electrical connection passes.

29. (New) The digital imaging assembly as in claim 28 further comprising one or more stabilizing elements for providing stable support for connection of the first digital camera to the first insert.

30. (New) The digital imaging assembly as in claim 22 further comprising an electrical cable attached to said base portion for transmitting digital signals.

31. (New) The digital imaging assembly as in claim 30 further comprising a power cable attached to said base assembly for transmitting electrical power to the base portion.
